

VITUSFULL - Class A Organomineral Fertilizer

1. PRODUCT

VITUSFULL is a liquid product formulated for agricultural use. It is compatible with phytosanitary products and foliar fertilizers.

2. PRESENTATION

VITUSFULL is packaged in 1-liter and 5-liter containers.

3. TYPICAL ANALYSIS

VITUSFULL

PHYSICAL APPEARANCE	BROWN LIQUID
pH (as is):	9,0 – 10,0
Apparent density (g/cm ³):	1,19 – 1,22
Guarantees	Potassium (K ₂ O): 4.0% Organic Carbon: 12.0%

4. PROPERTIES

Promotes nutrient translocation during the grain filling stage of crops. Strengthens disease management and boosts crop yield.

5. APPLICATION

Recommended crops: Soybeans and wheat.

Recommended dose:

- **Combined with fungicides: 1x 1.0 L.ha-1 or 2x 0.5 L.ha-1**

Application Method: Foliar

6. STORAGE

VITUSFULL retains its characteristics when stored in a dry, ventilated environment, protected from sunlight and in closed packaging for 12 months. Inappropriate storage conditions, such as environments subject to high temperatures and/or prolonged periods, may cause changes in the physical characteristics of the product. However, even if they may not cause a loss in product performance, such factors should be avoided.

Packaging: 1.0 or 5.0 liter bottles

The suggestions and recommendations are based on our experience, but do not constitute a guarantee on our part. Our customers should conveniently adjust the recommended products to their working conditions, as well as to other products used during the process. The above suggestions are provided for informational purposes only.
